On Apr 22, 2001 this sequence version replaced gi:9798432.

During sequence assembly data is compared from overlapping clones.

Where differences are found these are annotated as variations
together with a note of the overlapping clone name. Note that the
variation annotation may not be found in the sequence submission
corresponding to the overlapping clone, as we submit sequences with
only a small overlap as described above.

This sequence was finished as follows unless otherwise noted: all
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              IMPORTANT: This sequence is not the entire insert of clone LA16-335H7 it may be shorter because we sequence overlapping sections only once, except for a 100 base overlap. The true left end of clone LA16-335H7 is at 1 in this sequence. true left end of clone LA16-321D2 is at 37208 in this sequence. true right end of clone LA16-444G9 is at 6146 in this sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               http://www.sanger.ac.uk/Projects/C_elegans/wormpep LA16-335H7 is part of a clone contig from the tip of the short arm of chromoson 16 spanning 2Mb of p13.3 (Higgs D.R., Filnt J., Daniels R., MRC Molecular Haematology Unit, Institute of Molecular Medicine, Oxfc (unpublished), and is from the Los Alamos, flow sorted human Chromosome 16 libraries constructed by Norman Doggett (unpublished), VECTOR: sCos-1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   regions were either double-stranded or sequenced with an alternate chemistry or covered by high quality data (i.e., phred quality >= 30); an attempt was made to resolve all sequencing problems, such as compressions and repeats: all regions were covered by at least one plasmid subclone or more than one M13 subclone; and the assembly was confirmed by restriction digest. The following abbreviations are used to associate primary accession numbers given in the feature table with their source databases: Em: EMBL; Sw:, SWISSPROT; Tr:, TREMBL; Wp:, WORMPEP; Information on the WORMPEP attabases can be found at
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Direct Submission

NOTE: This is a 'working draft' sequence. It currently consists of 24 contigs. The true order of the pleces is not known and their order in this sequence record is arbitrary, Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       as soon as it is available and the accession number be preserved.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    arbitrary. Gaps between the contigs are represented as runs of N, but the exact sizes of the gaps are unknown. This record will be updated with the finished sequence as soon as it is available and the accession number will be preserved.

A 40 kDa CC form (KI) of mesothelin appears to be derived from the 69 kDa CC specifically delivering an effector molecule to a tumour cell bearing an antigen comprising at least 10 contiguous amino acids CC bearing an antigen comprising at least 10 contiguous amino acids CC the effector molecule attached to a targeting molecule that specifically binds to mesothelin; and (b) contacting the tumour with CC the chimeric molecule such that the chimeric molecule specifically binds to mesothelin, and (b) contacting the tumour with CC binds to a tumour cell. Also claimed is a method for inhibiting CC mesothelin expression or activity by contacting mesothelin expression or activity by contacting mesothelin bearing CC cells with inhibitory nucleic acids for the mesothelin dener. The CC growth of cells bearing mesothelin mesothelin contacting the mesothelin contacting be used in vaccines for the inhibition or prevention of contacting can be transfected into a mammal containing tumour cells to screen for drugs useful in cancer treatment. The antigen has been designated mesothelin. The clone was isolated from a HeLa S3 cDNA libra:
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Agents
